I am a fullstack software engineer , proficient in most areas of software. Primarily a frontend developer, however I have used various technologies and programming languages to attain the desired software output. I have a key interest in cloud technologies to which I dedicate a large amount of my free time to attending and hosting events in the space.

EXPERIENCE

Wemolo, Munich,Germany — Senior Fullstack engineer

Jun 2023 - PRESENT

Building internal tool, Product research and implementation.Research on scalable Authorization and Authentication. Working on scaling systems processing millions of events per day

Quickbird, Munich,Germany — Fullstack engineer

Jun 2021 - Jun 2023

Responsible for designing solutions and turning client requirements into working software designs, taking a lead position in modeling and architecting the frontend of multiple apps, setting up a stable and secure backend infrastructure using Docker containers, and improving my teamwork skills while proactively helping new team members integrate.

Revstar Consulting, Tampa,USA — Team Lead

Jul 2020 - Jun 2021

I consulted various startups in the medical industry, designing solutions including frontend architecture, backend cloud serverless architecture, and database design, handling client requirements and change requests, leading an international team of 8 developers, and consulting on third-party data and API integrations.

Horizont London,UK — Fullstack engineer

Jul 2019 - Jun 2020

Developed the FITSQD fitness platform using React Native and NodeJS, created a blockchain mobile client with React Native and TypeScript, built resource management dashboards with ReactJS, and mentored development team members.

Dierbro, Italy — Frontend engineer

OCT 2018 - Jul 2019

Building a ERP app using React JS and React Native,Closely looking into performance and architecture in large scale apps.

EDUCATION

Univeresity of Tirana, Tirana,Albania — Bachelor in CS

MONTH 2016 - MONTH 2019

Finished university with a average of 8.9/10, Specialized in Distributed Systems.

SKILLS

Good communication,Team player, Dedicated and involved,Product-driven
